Art Unit: 1711

This Office action is in reply to applicants' amendment and response received May 10<sup>th</sup> 2004. In light of applicants' amendments and further consideration of the inventions claimed, the following restriction requirement is held to be required.

Consideration of the claims on their merits, including the rejections set forth by the examiner in the previous Office action and applicants' remarks made in the reply dated May 10<sup>th</sup> 2004, will be made upon election. Further, the IDS received June 14<sup>th</sup> 2004 has been received and will be considered upon reply to this restriction requirement.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 36, 37, 40-54, and 76-82, drawn to a formed isocyanate based reaction product material, classified in class 521, subclass 155.
- II. Claims 55-62, drawn to polyol material, classified in class 568, subclass 123.

The inventions are distinct, each from the other because of the following reasons:

Inventions II. and I. are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as a reactant in the formation of polyesters and the inventions are deemed patentably distinct since there is

Art Unit: 1711

nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Cooney whose telephone number is 571-272-1070. The examiner can normally be reached on M-F from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck, can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
